Meet Your Need

Business Requirement Specification

Table of Contents

1. Introduction

1.1 Document Purpose

This document communicates the business requirements and scope for developing Meet Your Need System. The scope of this document is to define the functional and non functional requirements, business rules and other constraints requirements.

1.2 Project Background

Meet Your Need empowers individuals to lead the much sought after laptop-lifestyle. It comes with immense freedom to work anytime, from anywhere in the world as long as the job is well done and on time.

Meet Your Need enables faster growth opportunities as compared to any full-time job. It also helps to nurture great interpersonal skills and the ability to deal with different kinds of situations. This is due to the exposure one earns while working simultaneously in a variety of fields and domains and with different people. "While it's always good to excel in one subject, freelancing exposes you to various kinds of companies and domains. As a result, you learn more in say five years of freelancing than being in one or two jobs in that same period of time". This happens because each time one deals with a new client directly, they are required to start from scratch and figure the entire unfolding process. Moreover, as a vendor (freelancer), one is required to build their own work portfolio to establish their credibility. This ends up making them a sales person, a pre-sales person and also marketing executive.

1.3 Goals of the project

Meet Your Need is a marketplace for vendors in fields like writing, graphic design and web development. The site **helps professionals find projects, communicate with clients and get paid**. If you're a new freelancer or new vendor, or working in a new field, you can rack up valuable experience without always having to pitch clients cold. Meet your need allows vendors can work remotely from anywhere in the world especially in India, making it easier for them to find and apply for projects.

It also allows clients to find and hire vendors from a global pool of talent, which can be especially useful for clients who need specialized skills or services

1.4 Client and vendor

Client:

- Individual or Organization that hires Vendor to complete specific task or set of tasks.
- Clients want good vendor, who do their job and deliver
- Client wants to buy the service
- Clients want the reliable worker as a vendor that they feel they can trust.
- . Clients may have a one-time need for a vendor's services or may hire vendors on an ongoing basis for multiple projects.
-

Vendor

- Service provider.
- Show their talent and get paid.
- Can work in variety of fields such as writing, graphic design, programming etc depends on their talent or experience.
- Self Employed individual who offers their services to multiple clients

2. Business Requirements Overview

- Meet Your Need System is the public web application.

- Meet Your Need System will be opened to the global, but in the phase 1, the main target is in the India.

- There are mainly two types of user. One is the Client and other is vendor.

- Client can search for the vendor who are providing the specific services
